

ESP Choice

Enhanced Service Program Options

Be **ready** for anything with
EFI's ESP Choice

Ensure the success of your business with a customizable EFI™ ESP Choice service and maintenance agreement for EFI superwide and wide-format inkjet printing systems. Choose the options that match your anticipated business needs to maximize uptime, keep costs low, and make it easier to predict service and maintenance costs year after year.

ESP Choice options

Targeted service response times¹, including one-, two- and three-business-day options.

On-site emergency service visits to fix technical issues that you are not able to resolve on your own. EFI field service engineers provide service at your location, based on your response-time plan level, nature of the problem, and other factors.

If it takes more than one visit to solve the technical issue, you are not charged for multiple visits.

Preventative maintenance visits designed to maximize printer uptime.

Health-check site visits (half day) to evaluate printer health and provide recommendations to keep your printer working at optimum performance.

Additional printheads and belts can be included in your contract and are yours to keep even if you don't need them. Simply order them at any time during the contract term (cannot be carried over to new contract).

Discounts on additional printheads and belts are available when at least one is included in the contract for that same printer.

Non-consumable parts² can be included or excluded from the contract. When excluded, there is a 20% discount off parts list pricing.

Accessory replacement parts for 3/4 and fully automated material handling equipment (loaders, unloaders, stackers).

Fiery® proServer digital front end hardware support³, including unlimited telephone and email support during business hours with targeted response and resolution times.

Fiery software support with unlimited telephone and email support during business hours with targeted response and resolution times.

Online and phone-based technical support services are included in all ESP contracts to complement our ESP response capabilities. These services are a crucial first step in solving issues by providing access to repair information and diagnostic tools. They also provide the latest system versions of software or firmware in real time.

¹Varies by printer model and installed location. Not all plans are available in all areas.

²Inclusion of part may be subject to printer inspection.

³Coverage for Fiery proServer is limited to five years from the original ship date.
